DRY CLEANS, KILLS FLEAS

Removes Odors • No Soap or Water

Avoid the dangers of colds that so often follow a Water Bath in cool weather.

USE DRI-BATH

To bathe your pet, and kill fleas.
QUICK AND EASY TO APPLY

Directions:

Starting at the Animal's head, apply Dri-Bath liberally, rubbing in by hand until it penetrates the coat and reaches the skin in generous quantities on every part of the body. This process removes the dirt film from the coat and DRI-BATH kills the fleas by actual contact.

A thorough GROOMING with a BRUSH STIFF ENOUGH to penetrate the COAT is essential to remove dirt, dead fleas, and loose sticking hairs that annoy pets when shedding. Wiping with a rough cloth will remove any of the powder that may remain on the surface and leave the Coat and Skin clean and free of "D.O." A DRI-BATH once or twice a week will keep your DOG free of FLEAS and ODORS and the coat with its natural sheen.

IMMEDIATE RESULTS ARE OBTAINED FROM DRI-BATH WHEN USED AS INSTRUCTED.

Protect your garden from damage by dogs

SPRAY now with LIQUID CHAPERONE

won't dissolve in the rain

LASTS FOR WEEKS—Unlike ordinary repellents that vanish with the first shower, Liquid Chaperone is not dissolved in the rain. Users report that, regardless of weather, one application usually lasts from 2 to 3 weeks. Frequent sprayings wherever dogs do damage will often break the habits of offending dogs so that they will never come to your garden again.
